

# Parking Sensor Protectors

***Parking Sensor Protectors are especially engineered to guard parking sensors against damage by sanding and painting during bumper repair process.***

No need to remove the bumper to disassemble the sensors.

No need for time consuming custom fabrication of cover from traditional masking tape.

***The Parking Sensor Protector is the only professional way to get this job done in the most effective and efficient way.***

- Very fast application
- Fits most modern parking sensors
- Sand and paint over sensors
- Very fast removal
- Prevent sensor malfunction after repair process
- Leaves no adhesive residue
